

I would like to comment on the issue of the LPFM. It is my understanding that this will affect the current FM translator service. It has been suggested that advocates of LPFM feel that there is little value in national or regional services such as K-Love. However stations such as K-Love serves this community with a commitment of family-friendly programming that my family and I enjoy and have come to count on. I listen to K-Love at home, in my car and even at work. It has a wholesome value and a positive and encouraging impact on communities all across America. To eliminate this type of programming for other programming would even have an impact on our youth. My grandson has had several problems in the past, but since he has started listening to K-Love his grades have gone up and he has improved his attitude and is no longer getting in trouble. We need wholesome influences in America, during this time of increasing violence and selfishness. Please preserve the service that hundreds of thousands of people have come to count on. Thanks! Sincerely, Denise Roush
